Services We Provide

1

PERSONAL INVESTIGATION

1 – Physical Surveillance :

refers to the process of closely observing and tracking an individual's activities throughout the day and night. This typically includes monitoring their movements, interactions, and behavior over 24 hours, ensuring no significant actions go unnoticed.

2 – Pre-Matrimonial Investigation :

A pre-matrimonial investigation is a background check conducted before marriage to gather information about a potential spouse.

3 – Post-Matrimonial Investigation :

A post-matrimonial investigation is a background check conducted after marriage to gather information about a spouse's activities or behavior.

4 – Spouse Cheating Investigation :

Spouse Cheating Investigation is a type of private investigation that focuses on uncovering evidence of infidelity within a marriage or relationship.

5 – Child Monitor Investigation :

This service focuses on the safety and well-being of a child by closely monitoring their activities and environment.

6 – Missing Person Search Operation :

A Missing Person Search Operation involves tracking down a person who has disappeared, whether voluntarily or involuntarily.

7 – Adultery Investigation :

An Adultery Investigation is conducted to gather evidence of infidelity or extramarital affairs within a marriage or relationship.

8 – Alimony & Maintenance Investigation :

This type of investigation is conducted to gather evidence in cases related to alimony (financial support provided by one spouse to the other after divorce) or maintenance (ongoing support for the spouse or children).

9 – Child Custody Support Investigation :

In custody disputes, this investigation focuses on gathering evidence to determine which parent is more suitable to have custody of the child.

10 – Loyalty Test :

A Loyalty Test is conducted to assess whether a partner, spouse, or employee is being faithful or trustworthy.

11 – Fraud & Theft Investigation :

This investigation is aimed at uncovering instances of fraud (deception for personal or financial gain) or theft (the act of stealing).

12 – Sting Operation :

A Sting Operation is an undercover operation designed to catch a person committing a crime or unethical act.

13 – Counseling :

In the context of investigations, Counselling refers to providing emotional and psychological support to individuals going through challenging situations, such as marital issues, custody disputes, or personal trauma.

14 – Debugging Services :

Debugging Services (also known as counter-surveillance) are used to detect and remove hidden surveillance devices such as bugs, wiretaps, or hidden cameras.

2

CORPORATE INVESTIGATION

1. Brand Protection :

This service involves safeguarding a company's brand identity from infringement, counterfeiting, or misuse. It ensures the integrity of the brand's reputation and protects its intellectual property.

2. Intellectual Property Rights Investigation & Enforcement :

This service helps in protecting and enforcing intellectual property (IP) rights such as patents, trademarks, and copyrights. It ensures that the IP holder's legal rights are not violated.

3. Copyrights and Trademarks :

This service focuses on securing and enforcing the legal rights associated with creative works (copyright) and brand symbols or names (trademarks).

4. Labour Court Cases :

These cases involve representing employers or employees in legal disputes related to labor law, such as wrongful termination, wage disputes, or workplace harassment.

5. Undercover Operation :

An undercover operation involves deploying investigators to act covertly in a business or social setting to gather evidence of criminal or unethical behavior.

6. Business Fraud and Cheating :

This service focuses on detecting fraud or deception within a business. Investigators look into financial irregularities, embezzlement, or cheating within the company to protect business assets and ensure legal action against offenders.

7. Business Background :

A business background investigation examines the history, financial stability, reputation, and legal standing of a company. This is crucial for evaluating potential partnerships, mergers, or investments.

8. Due Diligence Analysis :

This involves conducting comprehensive checks on a business or individual before entering into a significant financial transaction. Due diligence helps identify any hidden risks, legal issues, or potential liabilities.

9. Employee Background Screening :

This service involves verifying the personal, educational, and professional history of job candidates to ensure they meet the standards of integrity and competence required for a position.

10. Corporate Surveillance :

Corporate surveillance involves monitoring the activities of employees, competitors, or partners to detect fraud, espionage, or unethical behavior within a business setting. It helps maintain organizational security.

11. Research and Development :

This service focuses on investigating and analyzing market trends, competitor activities, and technological advancements to guide a business's innovation and product development strategies.

12. Market Survey for New Launching :

A market survey gathers data on consumer preferences, market demands, and competitor products before launching a new product or service. It helps businesses fine-tune their offerings to meet market needs.

13. Forensic Audit Investigation :

A forensic audit investigates financial records to detect fraud, embezzlement, or accounting errors. It often involves legal proceedings and provides evidence for litigation or regulatory compliance.

14. Skip Tracing & Asset Search :

This service locates individuals who have skipped out on legal or financial obligations, such as debtors or missing persons.

15. Insurance Risk Management :

Insurance risk management identifies potential risks that could lead to insurance claims and provides strategies to minimize them.

3

CIVIL CRIME INVESTIGATION

1. Murder Cases :

In murder investigations, detectives gather evidence to solve homicide cases by identifying the perpetrator and understanding the motive behind the crime.

2. Robbery Cases :

Robbery investigations focus on identifying the individuals responsible for theft through force or intimidation. Investigators gather surveillance footage, witness statements, and physical evidence from crime scenes.

3. Divorce Cases :

In divorce investigations, private detectives often collect evidence to support alimony, child custody, or property settlements claims. This can involve investigating financial records, tracking hidden assets, or uncovering evidence of infidelity.

4. Property Disputes Cases :

Property dispute investigations involve resolving conflicts related to the ownership or use of property. Investigators gather documentation, research property history, and verify ownership claims to help resolve disputes over land, real estate, or inheritance.

5. Litigation Support :

Litigation support involves assisting legal teams by providing investigative services to gather evidence, research facts, and analyze information related to court cases.

6. Asset Search :

An asset search is conducted to locate an individual's or organization's hidden or undisclosed assets, often in cases of divorce, fraud, or debt collection.

1. Gathering Evidence for Court :

This service involves collecting and compiling legally admissible evidence to support court cases. Investigators work to gather documents, witness statements, and physical or digital evidence, which can be used to strengthen legal arguments during trials or legal proceedings.

2. Fingerprint Analysis :

This involves examining fingerprints left at crime scenes or on objects to identify individuals. Experts compare prints to a database or suspects to match or exclude people involved in the crime, providing critical forensic evidence.

3. Handwriting and Signature Analysis :

This service is used to verify the authenticity of handwritten documents or signatures. Experts compare writing styles, strokes, and pressure patterns to detect forgeries or confirm the identity of the writer.

4. Data Recovery :

Data recovery involves retrieving lost, deleted, or corrupted information from digital devices like computers, smartphones, or storage media.

5. Computer Forensics Investigation :

Computer forensics focuses on examining digital devices to uncover evidence of illegal activities such as hacking, fraud, or cybercrime. Experts analyze files, emails, browsing history, and metadata to identify malicious actions and present evidence in court.

6. Audio/Video Analysis :

This service involves analyzing recorded audio or video footage to verify authenticity, enhance quality, or identify tampering.

7. DNA Test :

A DNA test compares genetic material (like hair, blood, or saliva) to identify individuals. This is often used in criminal cases, paternity disputes, or to establish relationships between individuals with near-certain accuracy.

8. Lie Detection :

Lie detection, often using polygraph tests, measures physiological responses (such as heart rate and perspiration) to determine if a person is being truthful.

1. Social Media Fraud :

Social media fraud involves scams or deceptive practices conducted through platforms like Facebook, Instagram, or Twitter.

2. Private Photos Viral on Social Media :

This service deals with the unauthorized sharing of private or sensitive photos on social media platforms.

3. Bank Fraud :

Bank fraud investigations focus on uncovering illegal activities involving financial institutions, such as identity theft, credit card fraud, or unauthorized withdrawals.

4. Mobile Hacking :

Mobile hacking involves the unauthorized access to personal data on smartphones.

5. Ethical Hacking :

Ethical hacking is the process of testing a system's security by simulating cyberattacks to identify vulnerabilities.

6. Protecting Social Media :

This service focuses on safeguarding individuals' and businesses' social media accounts from hacking, data theft, or online harassment.
